

Luxury Villa for sale in Benalmádena

4 Bedrooms | 5 Bathrooms | 517 m² Interior | 256 m² Terraces | **Garage** Yes |

Property Description

This 4 bedroom, 4 bathroom villa is designed in contemporary architectural style, with clean, fine lines, large windows, and high two-story ceilings. To break with this austerity, stone is used, which adds a natural touch to the houses, combining better with the environment where they are located and adding warmth to a style that can be somewhat cold.

The 516 square meters built are distributed over two floors and a basement, where the finishes in noble materials, the bright rooms and the large windows that connect the interior and the exterior stand out to create a unique fluid space that merges the house with the environment.

To maintain the connection between the house and its surroundings, outside each villa has a large garden with an infinity pool overlooking the Mediterranean Sea, which manages to maintain a continuum that begins inside the house and continues to the horizon.

This turnkey villa project is about contemporary villas built with the Hormitech system. This system has many advantages, including its speed of construction and sustainability.

In just 5 months we are able to build a complete villa with top quality materials, thanks to the use of large concrete panels, assembled together in a single piece. On the other hand, these panels break the thermal bridge, which makes homes more energy efficient.
